

Billboard Pop-up Display

Step 1

With frame on ground begin to pull it open so the frame is fully extended.

Step 2

Make sure the magnetic connectors have all locked into place.

Step 3

To install the graphic, start by laying the graphic over the frame and securing one of the top corners of velcro to the velcro pad in the corner of the frame. After one top corner is attached, stretch the graphic to the velcro pad on the other top corner of the frame. Now press down the velcro on the velcro pads that are in-between the top two corners. Repeat for the bottom. After the bottom is secure press down the sides.

Step 4

Stand the display upright. If your display has endcaps you can now secure them to the velcro on the back of the frame.

If you wish to keep the graphic on the frame, evenly tuck the graphic over the frame like the picture above in order to avoid being pinched by the collapsing frame.
