

Awesome Graphics has partnered with Rutland Regional Medical Center on just about every kind of large format or specialty printing available. We have worked on their vehicles, wraps of their amazing awards on the exterior brick, unique LED backlit signage, way finding signs just to name a few. We have worked together to help advance their brand identity while making it easier for folks to find where they're going or make sure they are in the right place. It's been a magical connection and we're proud to have been a part of our area's finest hospital.
