

We greatly value our long-standing partnership with Community Health and have collaborated closely with their outstanding marketing team on a wide range of signage projects. Our work has included a full rebrand of their exterior signage, encompassing fabrication and installation across multiple locations. We've also provided pole banners and various wayfinding solutions to enhance their visual identity. Inside their facilities, we've completed numerous projects such as installing acrylic and aluminum dimensional wall logos and lettering, decorative plaques with standoffs, informational posters, vibrant wall murals, and frosted vinyl designs for interior glass. Over the years, we've supported them across nearly every print category, and we look forward to continuing to deliver high-quality work well into the future.
