

# Killington

We've truly enjoyed our working relationship with Killington over the past 30 years. From small-scale projects like stickers and window graphics to large-scale installations like wrapping gondolas, it's been a pleasure to bring their vision to life across such a wide variety of creative work. It's partnerships like this that make what we do so rewarding, and we're proud to have played a part in shaping the visual identity of such an iconic destination. We love what Killington has done for our great city and look forward to the expansions to come!
